

GARY BROWN'S ESSENTIAL BAIT FISHING RIGS

LIVE PRAWN RIG

Whether you are using a running ball sinker onto the bait, a sliding sinker onto a swivel and a long or short leader, a paternoster rig or suspend it under a float, live prawns are brilliant bait. Position your hook in the second or third section of the body up from the tail. This will allow the prawn to flick about, attracting your next fish. I would use either a circle or wide gaped hooked.

I have caught so many different fish species around Australia on a live prawn. Everything from barramundi, blue and threadfin salmon, estuary cod and mangrove jack love a live prawn.
