

GARY BROWN'S ESSENTIAL BAIT FISHING RIGS

CRAB RIGS

Most of the time when I am using crabs for bait they are dead. This stops them from crawling off into a hole and hiding from the fish. Off the rocks drummer, groper and bream can't seem to resist them. And bream find them very tasty in the estuaries and bays.

Red crabs off the rocks seem to work the best for me when targeting drummer and groper. While the green and brown crabs will be taken by just about everything.
