

# GARY BROWN'S ESSENTIAL BAIT FISHING RIGS

---

## BREAD RIGS

In the diagrams you will find one bread bait has been moulded and the other is only half moulded onto the hook. The top one will give you that extra casting distance you may need when fishing unweighted, while the bottom rig will allow the bread to float or slowly sink.

Bread is inexpensive, easy to get your hands on and is a favourite of mine when it come to targeting mullet, garfish, bream, drummer, luderick and even carp.
