

GARY BROWN'S FRESHWATER BAIT FISHING RIGS

WORM RIGS FOR FRESHWATER

How to rig a garden, red, or tiger worm for freshwater fishing.

Freshwater water worms come in a variety of types and sizes and they are one of the best baits to use when chasing trout, Atlantic salmon, bass, golden and silver perch, Murray cod, carp, redfin, estuary perch and catfish.

They are very simple to rig on a hook and can be used while using a number of different rigs, including the paternoster, running ball sinker down onto the hook, a running sinker down onto a swivel and a leader of about a metre, suspended under a bubble or stemmed float with a small spit shot or just unweighted. You can check these rigs out in Gary Brown's Essential Bait Fishing Rigs.

When fishing with scrub worms I prefer to use only one worm and when it comes to fishing with garden, red or tiger worms I tend to put 3 or 4 on the hook as this gives more of a wiggle factor.
