

# GARY BROWN'S ESSENTIAL BAIT FISHING RIGS

## BOBBY CORK RIG

If I am using an A-Just-A Bubble float (fixed position) I will select my depth before I cast. You can add a bit of water inside for that extra casting distance. If using it a night you can add a small light stick inside.

If I am using a bobby cork I will use a running rig where the use of a plastic stopper is a must.

Bobby cork rigs are effective on a wide range of species, including gar, mullet, luderick and drummer.
